Subject: Follow-up on the status of the Induced Seismicity Paper

Before too much time passed since yesterday's meeting with the state oil and gas agencies, I wanted to provide each state with the information on the Induced Seismicity paper. I don't have everyone in the meeting's email address, so please share this message appropriately with your state agency colleagues.

A version of the last draft was released under a FOIA request, so here are the instructions for obtaining a copy via the FOIA website. It is the version that we sent to a panel of technical contributors (subject matter experts in industry, academia, and other agencies). Currently, we are reviewing and incorporating as appropriate the comments made. Hopefully in the fairly near future, the comment matrix and revised document will go back to the National Technical Workgroup's working group. A couple of you or your state colleagues are members of that group and will get another opportunity to review the next generation of the paper.

Let me know if you have questions about the materials.
